

SNAP N LOCK INSULATED PANEL

- Skins of the Snap N Lock panel are rolled to form a unique, patented locking system that snaps together.
- The continuous insulated foam interface makes the design of the panel extremely energy efficient.
- Sealant is applied on the inside of the panel protecting it from ultraviolet destruction and forming a waterproof seal.
- Use the existing finish or apply a variety of building materials including shingles and vinyl siding directly to the exterior of the panel.
- Available 2" – 8" thick and up to 32' in length.

HALF SNAP INSULATED PANEL

- Skins on one side of the panel are rolled to form a unique, Patented locking system that snaps together quickly and easily. Oriented strand board is bonded to the other side of the panel to provide a workable surface for applying various building materials.
- The baked enamel finish provides many years of maintenance free beauty.
- The continuous insulated foam interface makes the design of the panel extremely energy efficient.
- Available up to 24' length and 4", 6" and 8" thick.

FLOOR & WALL INSULATED PANEL

- Oriented strand boards is laminated to both sides of a polystyrene foam core which provides strength and a surface for which to apply various building materials.
- Built-in insulation saves valuable construction time.
- Installation is quick and easy.
- An optional metal vapor barrier can be applied to protect the panel from moisture.
- Panels are manufactured up to 24' long and 4 1/2", 6 1/2", 8 1/2" and 10 1/2" thick.
